NOTE: "LE" in above part number denotes Leading Edge

WHAT IS A "LEADING EDGE SRL"?

- SRL Leading Edge (LE) devices are SRLs that have enhanced design features for use in leading edge applications; they provides additional protection against the sharp or abrasive surfaces found on many construction sites and are capable of withstanding a fall over a leading edge
- Unlike standard SRL's, SRL LE units are designed for use in both vertical and horizontal applications; the ability to work in a horizontal position vastly increases the versatility of LE units

SRL LE APPLICATIONS

- Boom lifts, scissor lifts (need to tie off at your feet)
- Roofers on sloped or flat roofs (no overhead anchor points)
- Steel erectors (possibility of lifeline coming in contact with an edge during a fall situation)

Compliance Roofer's Kit

PEAKWORKS TOOL TETHERING SYSTEM

A ROUND CLAMPS

- Designed for use with round and hex shank tool bodies

B FLAT CLAMPS

- Designed for use with wide or flat tool bodies
- Small flat clamp fits a range of wrenches approximately 7/16" to 1-1/4"
- Large flat clamp fits a range of larger wrenches approximately 1-1/4" to 1-7/8"

C PRESS BLOCKS

- Designed for use with round and hex shank tool bodies and larger tools
- Comes with standard hex shaped opening and includes a separate rubber insert that can be placed between the tool and the clamp for extra sizing compatibilities and increased clamping grip

D WRIST AND HARNESS LANYARDS

- The wrist lanyard features a built-in heavy duty adjustable wrist collar on one end and a small carabiner on the other, conveniently tethering the tool to your wrist
- The standard lanyard features two small carabiners designed to connect to the clamp and the other end to operator (or a suitable anchor)
- The small carabiner is designed to fit into the molded eye hole built-in to each of the tool clamps and is used to tether the tool to your body or to a suitable fixed anchor
- Designed for tools with a maximum weight of 15 pounds.

Do not exceed this weight limitation
